

# Environmental Policy

PRODEMAN S.A. aims towards sustainable production, achieving a balance between economic growth, environmental protection and social development. In addition, the company has the mission of reducing greenhouse gases generated by its activity. That is why the environmental commitment of PRODEMAN S.A. includes conditioning and product manufacturing and is supported by the following pillars:

- 
- To meet all the legal and other environmental requirements.
  - To minimize adverse environmental impacts by using economically viable technologies and procedures.
  - Achieve efficient use of energy and fuels.
  - To minimize waste and maximize recycling.
  - To make efficient use of materials
  - To raise environmental awareness of the personnel through continuous training.
  - To promote a circular economy and the sustainable development of the society.
  - To constantly improve the performance of the environmental Management System.
  - To communicate all relevant environmental information to staff and keep this policy available to all interested parties.
