

Environmental policy

OC BIOENERGIA S.A.S aims its actions towards the generation of renewable energy achieving a balance between economic growth, environmental protection and social development by means of using solely biomass. Due to this, our environmental commitment covers peanut's shell energy recovery and it is based on the following foundations:

-
- Comply with the current environmental regulations and other requirements.
 - Minimize adverse environmental Impact.
 - Produce electrical power using natural resources efficiently and promoting sustainable development.
 - Manage waste efficiently and assess alternatives of reusing by-products.
 - Create environmental awareness through continuous employee training.
 - Improve constantly the performance of our environmental management system.
 - Communicate all important environmental information to employees and keep this policy available.
-
